ARP* SERIES 4000 ENCAPSULATED FUNCTION GENERATORS FOR
USE IN CUSTOM ELECTRONIC MUSIC SYNTHESIS
SYSTEMS.

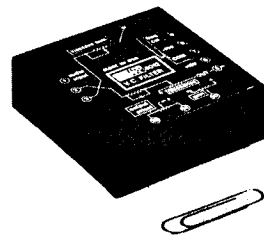

| | | |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| 4012 | Voltage Controlled Low-Pass Filter <i>Greater than 10-octave range. DC coupled. Resonance from 0 to 20dB.</i> | \$95 |
| 4014 | Balanced Modulator <i>Carrier suppression at least 60dB.</i> | \$95 |
| 4015 | Sample & Hold <i>Fast access, very low drift.</i> | \$75 |
| (4017) 4027 | Voltage Controlled Sawtooth Oscillator <i>Greater than 10-octave range. Will operate from 1.0 Hz to 30 KHz without external capacitors. Can be synchronized.</i> | \$95 |
| 4018 | Waveform Converter <i>Converts sawtooth wave to triangle, sine, pulse.</i> | \$60 |
| 4019 | Voltage Controlled Amplifier <i>100 dB dynamic range. Linear or dB/volt control. High control rejection.</i> | \$75 |
| 4020 | Envelope Generator <i>Attack, Decay, Sustain, Release, from 3 millisecond to 3 seconds. 0 to +10v output.</i> | \$95 |
| 4022 | White Noise Source <i>Regulated output 8 volts RMS. Circuit package 2" X 1" (see below).</i> | \$45 |

NOTES:

1. Quantity discounts—applied to each purchase order—total list price:

| | |
|--------------|---------------|
| Above \$ 500 | List less 5% |
| Above \$1000 | List less 10% |
| Above \$5000 | List less 20% |

2. These units contain proprietary circuit designs of Tonus, Inc., and their purchase does not convey a license to copy them for any purpose.

All Series 4000 Function Generators are encapsulated in 2" X 2" packages like the above. Exception: 4022.
